## 1 Problem

Derive a Canonical SOP expression for a Boolean function F, represented by the following truth table

| A | В | С | F(A,B,C) |
|---|---|---|----------|
| 0 | 0 | 0 | 1        |
| 0 | 0 | 1 | 0        |
| 0 | 1 | 0 | 0        |
| 0 | 1 | 1 | 1        |
| 1 | 0 | 0 | 1        |
| 1 | 0 | 1 | 0        |
| 1 | 1 | 0 | 0        |
| 1 | 1 | 1 | 1        |
|   |   |   |          |

### 2 Solution

### 2.1 KMAP Implementation

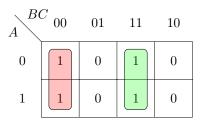

Figure 1: SOP for F using KMAP  $\,$ 

The given expression can be minimized using KMap as shown in Figure 1. Using implicants in figure, SOP terms obtained are:  $\bar{B}\bar{C}+BC$ 

### 2.2 Minimized SOP Expression

$$F = \bar{B}\bar{C} + BC$$
